Problem Statement :

Covid - 19 (Novel Corona Virus) has resulted in Schools adopting an online approach. "But" the tuition classes and connecting/finding your favourite teachers for some one on one classes or individual after school coaching options are still missing. Students/Parents are still not sure, how they will find that high rated Personal Tutor. How the Child can get that personal attention, from the safety of their home. Give assessments and get that extra something, that extra boost. **With YourAcademy, we bring to you a platform, where the student can choose from a pool of Subject Teachers, of their grade and learn with them.**

Detailed description of your solution :

Something that always gave a peace of mind to Indian Parents : Tuition Classes

Covid - 19 (Novel Corona Virus) has resulted in Schools adopting an online approach. "But" the tuition classes and connecting/finding your favourite teachers for some one on one classes or individual after school coaching options are still missing. Students/Parents are still not sure, how they will find that high rated Personal Tutor. How the Child can get that personal attention, from the safety of their home. Give assessments and get that extra something, that extra boost.

With YourAcademy, we bring to you a platform, where the student can choose from a pool of Subject Teachers, of their grade and learn with them. Register as a Student, select your Year of education, and find the most highly rated tutors in any Subject where you need that extra help. One on One and Group classroom sessions can be booked, in a monthly, quarterly or annual way, only if you love the free trial session of your selected teacher. Find the selected slots in your calendar, also a 15 min reminder of upcoming session. Also, after every Video session, the session will be sent in the form of notes and   added to the student profile.

For Teachers, it gives a platform, where they can come and register, get their KYC done and start teaching. If you are Qualified, and want to spread the flame of education, come join us and become a tutor in YourAcademy. This will open new opportunities for people who are eligible and want to spare some free time helping kids.

For Parents, we provide the Parent Connect, register as a parent, and get the detailed reports of your Childs Digital attendance, how is the child performing in after session quiz's, and also results of various online assessments.

Come embark on this Learning journey with us, where YADI, our inhouse chatbot, is there to help you with all your queries.

YourAcademy is a platform, where you can also request free doubt clearing sessions, where you and your tutors can quickly catch up and work on your educational roadblocks.

You can also benefit from our vast collection of Online Books, Assessments, Tutorials, and many more.

Teachers can benefit from out Teacher learning sessions, and also continuously improve, with our reviews and teacher comments, where the students can also help their teachers.

How we are different from others, your may ask… We are NOT a platform where you will find recorded sessions (Apart from the tutorials which we additionally offer), but we are a platform, where the Student and Tutor join for a Live interactive session. It's YourAcademy from the comfort of your home.
